EDUCATION

NATIONAL UNIVERSITY OF SINGAPORE

Aug 2023 - May 2027

Bachelor of Science in Business Analytics (Honors), Specialization in Finance & Minor in Economics

- Grade Point Average: 4.72/5.00
- Awards: Top Student award for Data Management and Visualisation out of 331 students
- Completed the University Town College Programme (Aug 2023 - May 2025) at Tembusu College

EXPERIENCE

The Coca-Cola Company | AI Engineer Intern

Jan 2026 - Jun 2026

- Developed and deployed an agentic application using LangGraph, SQL and Azure OpenAI to automate meeting preparation by analyzing strategic and performance data, reducing preparation time by 40% and adopted by organization leadership
- Architected a multi-agent RCA system using LangGraph and RAG to streamline root cause analysis investigations, reducing diagnostic time from 6 hours to 1 hour. Proposed workflow used as the blueprint for scaling toward an industry-standard pilot.
- Built a cost-efficient semantic search system using SBERT, FAISS and Qwen 2.5 to cut failure resolution time by 25%
- Constructed a reusable agentic AI framework on Azure OpenAI with a custom tool registry and base agent template to standardize LLM-powered agent development for future AI projects

Synthesis | Data Science Intern

May 2025 - Aug 2025

- Engineered a GCP pipeline using BigQuery and Vertex AI to ingest and transform unstructured YouTube metadata for downstream clustering and network analysis workflows via Gemini batch predictions
- Supported a client geosegmentation project in a team of 4 to identify optimal F&B partners for market entry by owning development of an end-to-end data pipeline to perform EDA and rule-based filtering on geospatial data
- Optimized a geospatial data extraction pipeline for geosegmentation client projects using Geopandas and Google Maps Grid Search API, improving retrieval coverage by 15% and cutting query time by 25%

National University of Singapore | Teaching Assistant (Data Visualization & Management)

Jan 2025 - May 2025

- Mentored 30 undergraduates on SQL, data analysis and building Tableau dashboards, with emphasis on translating data insights into business recommendations
- Led tutorials on data storytelling and data visualization, achieving a feedback score of 4.6/5.0

PROJECTS

Graham | Group Project

Apr 2026 - May 2026

- Co-built an AI-powered equity research platform that consolidates stock screening, company analysis, valuation and portfolio optimisation into a single application
- Designed an LLM pipeline that fetches and parses 10-K filings and real-time financial data to identify moats, suggest bull/bear cases and generate investment recommendations for any stock
- Leveraged GPT-5-mini to suggest DCF model assumptions (growth rates, terminal value) and recommend industry peers for comparable analysis

Nomster | NUS Web Application Development Project

Mar 2025 - May 2025

- Managed product roadmap and sprint planning for a 6-person team, prioritizing features based on pre-defined user needs and analytics to deliver a production-ready restaurant discovery platform

CO-CURRICULAR ACTIVITIES

NUS Alumni Ventures | Innovations and Insights Associate

Sep 2024 - Aug 2025

- Conduct market research on trending industries and technologies for article write-ups
- Pioneered a collaboration with the SMU AI club to organise an expert panel discussion for ~ 50 participants

Tembusu College Ultimate Frisbee | Team Member

Aug 2024 - May 2025

- Represented Tembusu College in the NUS inter-college games as a member of the Ultimate Frisbee team

TECHNICAL SKILLS & INTERESTS

- **Programming Languages:** Python (Pandas, NumPy, scikit-learn), SQL, JavaScript
- **Data Science & Analytics:** AI & LLMs, Machine Learning, Exploratory Data Analysis, Statistical Modelling, NLP
- **Data Engineering & Platforms:** Databricks, Azure, Google BigQuery, Google Cloud Platform
- **Interests & Hobbies:** Football, Hiking, Pickleball, Equity Research (US Markets)
